Education

Manipal University of Jaipur	Jaipur, UG
Bachelor of Technology, Computer Science, November 2021 - July 2025	8.2/10

Work Experience

Frontend Web Developer Intern Solution Aver InfoTech Kota, Rajasthan	July 2023 – August 2023
---	--------------------------------

- Collaborated with 2-3 cross-functional teams to design visually captivating, user-friendly web applications using HTML, CSS, and JavaScript, increasing user engagement by 20%.
- Revamped 2-3 responsive designs, resulting in a 25% improvement in user experience across mobile and desktop devices.
- Effectively slashing bounce rates by 15%.
- Spearheaded a harmonious project team of 8 colleagues to meet project deadlines.
- Participated in 1 to 2 daily stand-up meetings, and communicated technical concepts effectively, fostering a collaborative and productive work environment.

Frontend Web Developer Intern AVID Web Solutions Kota, Rajasthan	August 2023 – August 2023
---	----------------------------------

- Enhanced web development practices, contributing to a 25% reduction in application bugs and a 30% faster website loading speed.
- Actively participated in 7 code reviews, identifying and resolving issues in over 100 lines of code, improving application stability.
- Led 3 major debugging sessions, ensuring a 100% bug-free user experience in the final release.

Technical Skills

Programming Languages: C/C++ | HTML | CSS | JavaScript | MySQL | MongoDB
Frameworks & Technologies: React.JS | Git | Bootstrap | SASS | Netlify | Tailwind CSS | Vercel | Git | Github | Axios
Skills: Design Analysis Algorithm, Data Structures (250+ solved problems), Software Testing (HP/QTP, Postman)

Projects

HostelEats [link](#)
October 2023 – Present

- Developed a food delivery app frontend using React.js and Tailwind CSS, resulting in a 35-40% increase in user engagement and a 10% reduction in bounce rates.
 - Achieved an average page load time of under 2 seconds, improving overall user retention by 15%.
 - Engineered with React.js and styled to perfection using Tailwind CSS.
 - Resulting in a web app with an astounding average loading time of under 2 seconds.
- Challenges:** Created a clean and concise UI that enhanced user experience and reduced page navigation time by 20%.
Future Enhancements: Plan to integrate real-time order tracking to increase app engagement by 25%.

BlogBuster [link](#)
December 2023 – Present

- Built a scalable blogging platform using React.js, MongoDB, and Docker, hosting over 50+ blog posts in the first month of launch.
 - Integrated Google and GitHub authentication, streamlining login processes for 100+ active users.
 - Designed a dynamic content management system, enabling 200+ blog posts to be created and updated in real time.
- Challenges:** Optimized performance for high traffic, reducing page load times by 30% during peak usage.
Future Enhancements: Plan to add advanced analytics features, projected to increase user engagement by 15%.

Netflix-Clone [link](#)
September 2023 – Present

- Developed a Netflix clone with React.js and Tailwind CSS, featuring real-time updates of 10,000+ movies and TV shows, powered by TheMovieDB API.
 - Optimized content delivery and image loading, reducing image load time by 40%.
- Challenges:** Managed over 600 lines of code and ensured 100% responsive design across 5+ device types.
Future Enhancements: Plan to improve database performance, aiming for a 50% reduction in API request latency.

Achievements

- **3-Time Topper on Coding Ninjas**
- **Freelancing Experience:** Successfully completed freelancing projects, including web development, showcasing versatility and client-focused solutions.

Certification

- React Basics Coursera(Meta)
- NPTEL (Design Analysis Algorithm)
